

BRANCH ASSIST

Feeling the pressures of a large loss event and a small staff?

SCI has solutions for your business demands.

During times of high claim volume following a catastrophic event, you may find your office in need of immediate temporary claims professionals to assist in overseeing and managing losses. You may be faced with obstacles that prevent you from providing your clients with a timely response to the claims that have been filed. SCI has a solution for your business demands.

SCI provides you with a team of true claims professionals, many of whom possess carrier backgrounds, to assist your organization during times of high claim intake resulting from staffing shortages or unexpected events. This is a scalable, and easily contracted solution, which provides rapid access to highly skilled claims professionals, across most claim types, (i.e., Property, Marine, Auto, General Liability), enabling you to avoid unnecessary hiring of employees.

These professionals possess the skill sets necessary to work independently within a client's office, or remotely, with little to no supervision, thereby, freeing up valuable client resources to be utilized elsewhere within their organization.
